

Yahya Alsharif

Software Engineering Student

Makkah Region, Saudi Arabia | yahya.alsharif567@gmail.com | [LinkedIn](#)

Summary

Software Engineering student skilled in artificial intelligence and software development, with a strong foundation in machine learning and practical software engineering. Pursuing a Bachelor's degree in Computer Software Engineering at Umm Al-Qura University and an Artificial Intelligence specialization at KAUST Academy. Experienced in academic projects, AI models, software tools, and collaborative problem-solving, with a focus on developing practical software solutions.

Education

Bachelor of Computer Software Engineering

2023 – 2027 (Expected)

Umm Al-Qura University

Makkah, Saudi Arabia

- Maintaining a strong academic record with a GPA of 3.88 / 4.00, demonstrating consistent academic excellence.
- Working on ESAS – Experience Saudi As a Saudi, a graduation project focused on designing and developing a software platform for authentic, locally curated tourism experiences in Saudi Arabia.
- Completed academic projects and delivered technical presentations in software development, requirements engineering, software testing, system analysis, algorithms, and data structures.

Artificial Intelligence Specialization

2025 – 2026

KAUST Academy

- Selected for KAUST Academy's multi-stage Artificial Intelligence specialization program, designed to build AI knowledge through foundational learning, advanced coursework, and a summer program focused on real-world experience.
- Advanced to the final Summer Program after completing the first three stages, ranking among the top 100 students selected from 14,000+ applicants.
- Focus areas: artificial intelligence foundations, machine learning, deep learning, convolutional neural networks, problem-solving, and applied AI projects.

Projects

ESAS – Graduation Project

Umm Al-Qura University

Makkah, Saudi Arabia

- Served as project coordinator, contributing to brainstorming, planning, requirements gathering, and transforming the initial idea into a structured software engineering project.
- Developed and documented the project's software requirements, system workflows, use cases, system diagrams, and Software Requirements Specification (SRS).
- Supported the implementation of the system across backend and frontend components, including user flows, provider and admin workflows, experience listings, booking-related features, and demo-ready functionality.
- Showcased the project poster and live demo at the INJAZ 2026 Graduation Projects Exhibition, explaining the system to instructors, reviewers, and visitors while answering questions about the project's idea, design, and implementation.

Certificates & Training

- **Advanced Artificial Intelligence Certificate** — KAUST Academy
- **Convolutional Neural Networks** — DeepLearning.AI
- **Fundamentals of Deep Learning** — NVIDIA
- **Introduction to Artificial Intelligence** — KAUST Academy
- **Linear Algebra for Machine Learning and Data Science** — DeepLearning.AI
- **Introduction to Data Science in Python** — University of Michigan
- **Data Collection and Processing with Python** — University of Michigan

Skills

- **Programming Languages:** Python, Java.
- **Artificial Intelligence:** AI foundations, deep learning fundamentals, neural networks, convolutional neural networks, computer vision concepts, and applied AI problem-solving.
- **Software Engineering:** Object-Oriented Programming, requirements engineering, software requirements specification, system design, software architecture, software testing, documentation, and project coordination.
- **Machine Learning:** Machine learning fundamentals, linear algebra for machine learning, model training concepts, data preprocessing, and model evaluation basics.
- **Tools & Technologies:** Git, GitHub, VS Code, Codex.

Languages

- **Arabic** — Native
- **English** — Professional Proficiency (IELTS Academic: Overall 8.0, CEFR C1)
