PROFESSIONAL SUMMARY

AI Engineer at Mawhub and Software Engineering student at Umm Al-Qura University (GPA 3.89/4.00), with experience spanning applied AI, edge deployment, software engineering and testing. Coordinated a six-person graduation project and represented Saudi Arabia in Software Testing at WorldSkills Shanghai 2026.

EXPERIENCE

Mawhub, AI Engineer

Sep 2026 to Present

- Own implementation work from product requirements to delivery, turning product intent into technical plans across existing codebases and helping resolve the technical and product decisions implementation depends on.
- Implement, test and review AI and software changes through Git and GitHub workflows, documenting and integrating each change while keeping delivered behaviour aligned with product requirements.

KAUST Academy, AI Intern

King Khalid University, Abha | Jun 2026 to Aug 2026

- Owned the privacy-model track of a six-person team project mentored by KAUST faculty and researchers, covering dataset and label design, training, evaluation methodology, failure analysis and model iteration for on-device PII detection.
- Applied the internship's Edge AI and inference-optimisation work hands-on, carrying a transformer model from PyTorch training through ONNX export and INT8 quantisation to benchmarking on Raspberry Pi hardware.

WorldSkills Shanghai 2026, Software Testing Competitor

Sep 2026

- Selected as the college's candidate to train for and represent Saudi Arabia in Software Testing, completing about four months of intensive preparation before the international competition.
- Tested unfamiliar systems against timed task specifications across API, web, mobile, performance and white-box testing, using Postman, Newman, Selenium, Appium, JMeter and pytest.

PROJECTS

OnKith, Privacy-Preserving Edge AI Voice Pipeline | Team Project, KAUST Academy

Jun 2026 to Aug 2026

- Redesigned the privacy model's data and evaluation strategy after exposing TinyBERT's out-of-distribution failure: defined a 31-entity ontology and leakage-aware evaluation over a 284,619-row corpus with a frozen OOD set, then adopted DeBERTa-v3-xsmall, raising OOD typed F1 from 0.46 to 0.62 and private-character recall from 0.32 to 0.84 while cutting hard-negative false positives from 0.65 to 0.24.
- Released the model as a 78.5 MiB INT8 ONNX artefact costing at most 0.018 typed F1, after tracing an apparent quantisation collapse to a span-decoding defect; on a 4 GB Raspberry Pi 5 it reached 0.945 typed F1 at 62 ms median masking latency, within a full voice pipeline running faster than real time (mean RTF 0.63).

ESAS, Experience Saudi As a Saudi | Graduation Project, Umm Al-Qura University

Aug 2025 to Aug 2026

- Coordinated a six-person team from concept through requirements, design and demonstration; owned the GitHub repository, merge reviews and much of the SRS and UML/BPMN design documentation.
- Implemented backend and frontend features for catalogue browsing, role-based access, booking and provider and admin dashboards in a three-role Spring Boot, PostgreSQL and Flutter prototype with JWT security and an Arabic/English UI; presented the poster and live demo at INJAZ 2026.

EDUCATION

Umm Al-Qura University, BSc Software Engineering

Aug 2023 to Jun 2027 (expected)

Makkah, Saudi Arabia

GPA: 3.89/4.00

KAUST Academy, Artificial Intelligence Specialisation

Nov 2025 to Jun 2026

- Selected among the top 100 of more than 14,000 applicants; completed the introductory and advanced AI levels to qualify for the 2026 Summer Internship.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, HTML, CSS.

AI and ML: PyTorch, Hugging Face Transformers, ONNX Runtime, INT8 quantisation, TensorFlow Lite, OpenCV, NumPy.

Testing: pytest, Selenium, Appium, Postman, Newman, JMeter; API, web, mobile and performance testing.

Software and Tools: REST APIs, React, Vite, Tailwind CSS, Git, GitHub, Docker.

Engineering Practice: requirements engineering (SRS), UML/BPMN modelling, code review, technical documentation.

CERTIFICATIONS AND LANGUAGES

Certifications: Advanced Artificial Intelligence (KAUST Academy); Fundamentals of Deep Learning (NVIDIA); Convolutional Neural Networks and Linear Algebra for ML and Data Science (DeepLearning.AI).

Languages: Arabic, native. • English, professional proficiency (IELTS Academic 8.0, CEFR C1).
